

Surveillance can be hard to achieve due to location, coverage, lack of installation and much more. By using GSM surveillance, all that is needed is a 2G data/network coverage and a poweroutlet. This makes a quick response to intruders in isolated areas possible.

The SafeHome Wireless Surveillance Indoor GSM Camera is furthermore a great solution for scheduled snapshots at a preset time of day.

Wireless Surveillance Indoor GSM Camera

Easy to Install • SMS operated • Night and Day • No Subscription

The SafeHome Wireless Surveillance Indoor GSM Camera is a standalone unit, easily mounted in your house, apartment, cabin, boat, warehouse or any other place from where intruder surveillance is desired day and night.

The camera has night view and a built-in motion detection feature and automatically snaps 1-5 pictures whenever motion is detected. Up to 10 mobile number can be programmed to receive these pictures as MMS and the receivers are furthermore able to retrieve surveillance photos upon request and/or activate the camera's microphone and listen-in feature.

The camera comes with two remotecontrols for easy arming/disarming the surveillance. Moreover, the remotecontrols are equipped with a panic button, which when pressed calls the programmed emergency numbers with listen-in activated.

The SafeHome Wireless Surveillance Indoor GSM camera uses a 220V poweradapter and has a built-in backup battery for up to 12H emergency power.

SafeHome GSM Overvågnings Kamera er en uafhængig enhed, der nemt monteres i hus, lejlighed, sommerhus, skur, båd, lager eller ethvert andet sted hvor man ønsker besked om uønskede gæster eller at overvåge med billeder og lyd dag og nat. Kameraet har night view samt bevægelsessensor og tager automatisk 1-5 billeder ved registrering af bevægelse. Op til 10 mobilnumre kan indkodes som modtagere af billederne som MMS, og modtagerne kan derudover få billeder tilsendt når ønsket.

Kameraets leveres med 2 fjernbetjeninger til nem til-/frakobling af overvågningen. Fjernbetjeningerne er udstyret med et panik knap, der aktiverer kameraets opkalds cyklus til de indkodede nødopkaldsnumre med "lytte-med" funktionen aktiveret.

SafeHome GSM overvågningskamera benytter en 220V strømforsyning og har indbygget backup batteri til brug i op til 12 timer.
