

Accessory

The SafeHome Wireless Alarm system can be divided into 8 zones – each with an unlimited amount of sensors, sirens and dial-up units.

Customize your alarm to fit your needs!

Alarm Sign Pack

Accessory for Wireless Alarm System WS300S/WS500S

The primary incentive for installing an alarm is obviously to prevent a forced entry, however a burglar should be made aware, that your building is equipped with alarm or surveillance.

This can prevent the breaking-in from being initiated, since the burglar knows of the increased risks associated with entering that particular building.

This type of preventive security is obtained by use of effective posting of SafeHome signs.

Features / KSP

- Preventive Security
- Durable and weatherproof ABS
- 4 selfadhesive signs for windows/doors
- 2 ABS signs for wall/garage/fence
- Oneway screws and plugs

Tech specs

- Dimensions (mm):
ABS: 100/70/3
Plast: 100/70/1
- Weight ABS (g): 23

HOTLINE SUPPORT • YOUTUBE • FACEBOOK

Installering af alarm har altid til hensigt at undgå indbrud, men en tyv skal gøres opmærksom på at netop dit hus eller din virksomhed har alarm eller overvågning installeret. Dette kan resultere i at indbruddet aldrig påbegyndes, da tyven kender risikoen ved at bryde ind et sted med alarm.

Denne form for præventiv sikring opnås med effektiv skiltning.

En SafeHome skiltepakke består af 2 UV-/vind-/og vejrbestandige plastskilte til montering på mur, garage, carport, hegn, havelåge eller lign. samt 4 selvklæbende SafeHome skilte til montering på døre eller vinduer.

Der medfølger envejs skruer samt plugs til montering af plastskilte.

Packing specs

- Blister pack, Eurohanger
- International design
