

Accessory

The SafeHome Wireless Alarm system can be divided into 8 zones – each with an unlimited amount of sensors, sirens and dial-up units.

Customize your alarm to fit your needs!

Wireless Siren Sensor

Accessory for Wireless Alarm System WS500S

A SafeHome Siren Sensor is a small sensor which is mounted on a smoke-/CO-/gasalarm.

Most building have sensors to detect smoke formation or increase of gas or carbon monoxide concentration, however the residents are not alerted by the units.

By use of the SafeHome Siren Sensor, the sound emitted from the siren of the unit is detected and this causes the SafeHome Alarm System to be triggered and thereby activating any dialup units and sirens connected.

Consequently, users and surrounding can be alerted of a developing situation and thus enabled to react in time.

HOTLINE SUPPORT • YOUTUBE • FACEBOOK

SafeHome Sirene Sensor er en lille sensor som monteres på selve røg-/CO-/gasalarmen. De fleste bygning har røgalarmer monteret eller sensorer til registrering af gas eller røgudvikling. Desværre meddeler disse alarmer ikke beboeren at de er blevet udløst.

En SafeHome Sirene Sensor opfanger alarmerne og sender signal til dit Safehome Trådløse Alarmanlæg, som derved udløses med udendørs sirene og/eller opkaldsenhed.

Derved bliver beboere gjort i stand til at reagere indenfor kort tid.

*) 3 layers, 6 exp. carton/layer

Features / KSP

- Triggers when siren is detected
- Up to 100m range
- Easy Installation
- Long batterylife
- Alarmsign Included

Tech specs

- Low battery indicator
- Adjustable sensitivity level
- Cord length: 30cm spiralcord
- Dimensions (mm)/weight (g):
Sensor: Ø30/6, 45
Sender: Ø66/23, 8
- Battery: 2 x 1,5V AAA Alkaline (not incl.)
- Frequency: 868 MHz
- With screws, plugs, adhesive tape

Packing specs

- Blister pack, Eurohanger
- 4 language (UK, DK/SE/NO)
