

## Preventive Security

*A dummy cam is an excellent choice for creating the illusion of surveillance and thereby increasing the preventive effect and preventing a burglary or other crime from happening.*

## Outdoor Dummy Camera

**Preventive Security • Outdoor • Aluminum • Flashing LED**

A dummy provides the impression of surveillance and thereby has a high preventive effect.

The SafeHome Outdoor Dummy Camera is made with an aluminum house with a weatherproof compartment for batteries, and should be mounted under eaves.

All SafeHome Dummy Cameras has builtin flashing red LED to draw attention and to add to the realistic impression of surveillance. Dummy Cameras can with great advantage be used as decoys to lure the burglar into an area monitored by an actual camera.

Med attrapkameraer gives der et indtryk af overvågning og skaber dermed høj præventiv effekt.

Det udenørs attrapkamera har et aluminiumshus med vejrbestandigt indeslutte til batterier, og monteres under udhæng.

Alle attrap kameraer fra SafeHome er udstyret med en indbygget blinkende LED, som både retter opmærksomhed mod overvågningen og samtidig får kameraet til at se ægte ud. Et attrap kamera kan med fordel benyttes til at lokke en indbrudstyv i et område, der overvåges af et egentligt overvågningskamera.
