Preventive Security

A dummy cam is an excellent choice for creating the illusion of surveillance and thereby increasing the preventive effect and preventing a burglary or other crime from happening.

Indoor Dummy Camera

Preventive Security • Indoor • Black • Flashing LED

A dummy provides the impression of surveillance and thereby has a high preventive effect.

The black indoor dummycamera has a black base and visible LED and is made in a generic design known from banks, malls, offices etc.

All SafeHome Dummy Cameras has builtin flashing red LED to draw attention and to add to the realistic impression of surveillance. Dummy Cameras can with great advantage be used as decoys to lure the burglar into an area monitored by an actual camera.

Med attrapkameraer gives der et indtryk af overvågning og skaber dermed høj præventiv effekt.

Det sorte indendørs attrapkamera har synlig LED og kan indstilles i den ønskede retning. Attrappen er produceret i velkendt design, som mange kender fra banker, centre, kontorer etc. Alle attrap kameraer fra SafeHome er udstyret med en indbygget blinkende LED, som både retter opmærksomhed mod overvågningen og samtidig får kameraet til at se ægte ud.
