Wireless Internet Camera HD Indoor

HD Surveillance • WIFI • Webbased software • Video/photo • Motiondetector

SafeHome Wireless MP Internet camera can be accessed by the builtin software for PC or by smartphone apps for Android and iDevice.

Users are able to pan up to 300°, tilt up to 120° and zoom x5 thereby monitoring very large surroundings.

The camera is equipped with a 67° lens for 1MP photos and video recording up to 720p resolution and the builtin 10 infrared LED continues the surveillance even during dark period in an 10m range. SafeHome cameras are preset for remote access and smartphones are easily configured by scanning a QR code.

When motion is detected, the camera can be set to send e-mail alerts to multiple users or even upload snapped pictures or video to an FTP or NAS location, if the user has access to such. Several users can be added as users with differentiated levels of access to settings and functions.
