Wireless Internet Camera HD Outdoor

HD Surveillance • WIFI • Webbased software • Video/photo • Motiondetector

SafeHome Wireless MP Internet camera can be accessed by the builtin software for PC or by smartphone apps for Android and iDevice. Users are able to zoom x5 thereby monitoring very large surroundings.

The camera is equipped with a 39° lens for 1MP photos and video recording up to 720p resolution and the builtin 18 infrared LED continues the surveillance even during dark period in an 20m range. SafeHome cameras are preset for remote access and smartphones are easily configured by scanning a QR code.

When motion is detected, the camera can be set to send e-mail alerts to multiple users or even upload snapped pictures or video to an FTP or NAS location, if the user has access to such. In addition, the camera is equipped with a microSD cardreader for storage.

Several users can be added as users with differentiated levels of access to setting s and functions.

The SafeHome Wireless Internet Camera is equipped with both microphone and speaker making is a great solution for social networking and chatting.
